

## My Editing Process for B&W Images

1. Apply a Channel Mixer adjustment.
  - a. Use preset "Black & White with Red Filter (RGB)"

2. Apply a Curves adjustment.
  - a. Add three points along the line where the squares meet.
  - b. Take the bottom point and move it 5 values up. Do the same with the top point but down.
  - c. Take the middle and right point and move them up about 5-10 values.
  - d. Take the left point and move it down about 5-10 values.

3. Crop the image.
  - a. My favorite crop ratios are 3x2 / 4x5 usually.
4. Save the image in your project folder.
  - a. (File > Save – Save As > jpeg)
